

Leica Laser Cinema CinePlay1

Excellent premium cinema experience everywhere.

With the Leica Cine Play 1, it's all about effortless, atmospheric cinema experiences wherever you want them. With the portable and flexible, intelligent mini projector, you can also project onto any white wall. Think big - really big! Developed for those who are looking for something unique and individual without compromising on first-class quality. The Leica Cine Play 1 is all about flexibility and joyful movie moments with the best picture in its class.

The Leica Cine Play is a state-of-the-art, compact and versatile smart mini projector designed for premium enthusiasts and technology lovers. Combining timeless design, superior optical performance, integrated powerful sound and user-friendly operation, it offers a high-quality cinema experience for home and outdoor entertainment without fixed installations. The innovative features, including a fully automatic alignment system, intelligent VIDAA operation and a unique Leica Summicron zoom lens, ensure hassle-free setup, flexible positioning and exceptional 4K resolution.

With the stand available as an accessory, the laser projector can be optimally positioned in the room at any time.
