

Openrock X black

The OpenRock X is the latest product and its open-ear design offers an optimal fit that does not squeeze the ear and prevents sweating. Due to the open design, you can hear important events around you while enjoying cinematic sound and comfortable wearing comfort as well as BassDirect™. With a 4-microphone noise-canceling, IPX5 rating and 50° x 45° adjustable fit - the OpenRock X is ideal for workouts and outdoor sports activities.

Especially when jogging and cycling, you can also hear ambient noise and are therefore safer on the move while enjoying your favorite music. Hearing damage is also prevented because the sound pressure can escape from the ear. The rechargeable battery and storage box provide 48 hours of playtime, so you can enjoy your music all day without breaks or power cuts, keeping your soundtrack going from sunrise to sunset.

With beamforming technology, 4 first-class microphones are arranged in such a way that optimum noise suppression is made possible and background noise is blocked out. This allows you to communicate clearly and undisturbed, even in strong winds.

The OpenRock app allows you to personalize features including equalizer settings, notification sounds, earbud search and firmware upgrades, further enhancing the user experience.
